Shreya Narayana Bhat

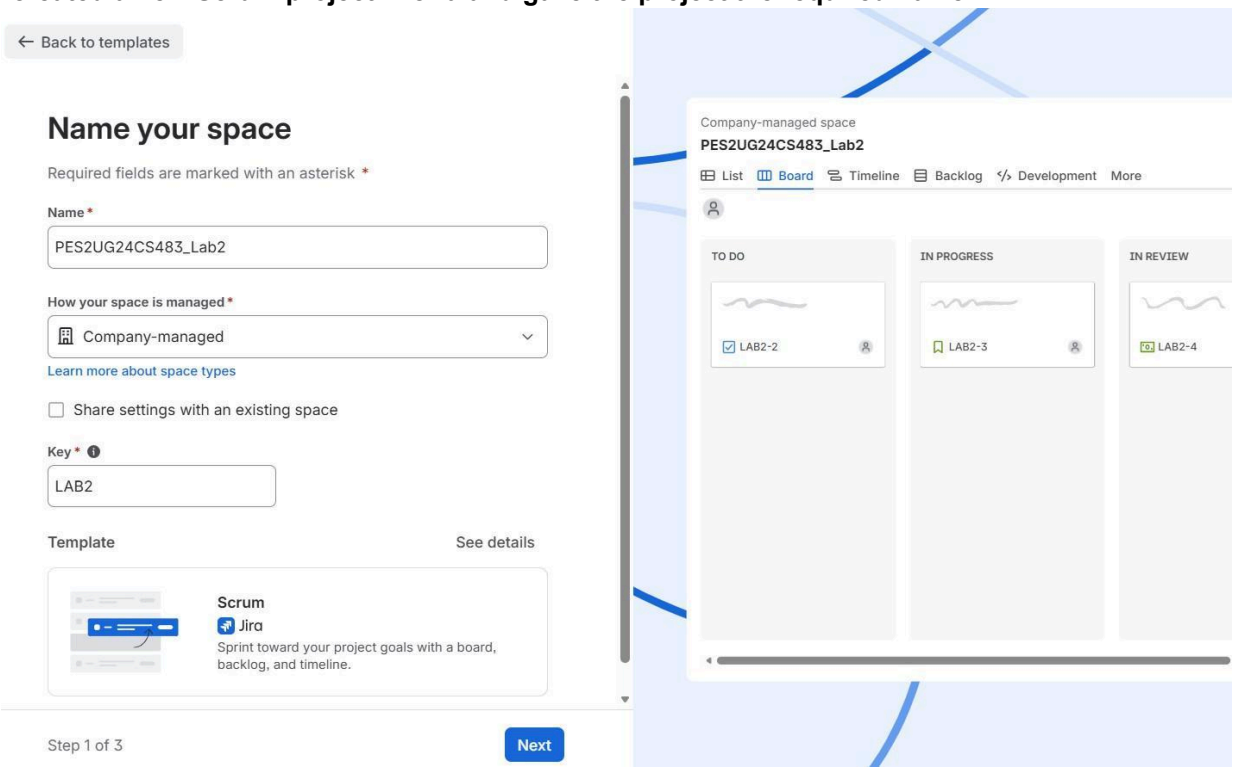

Login

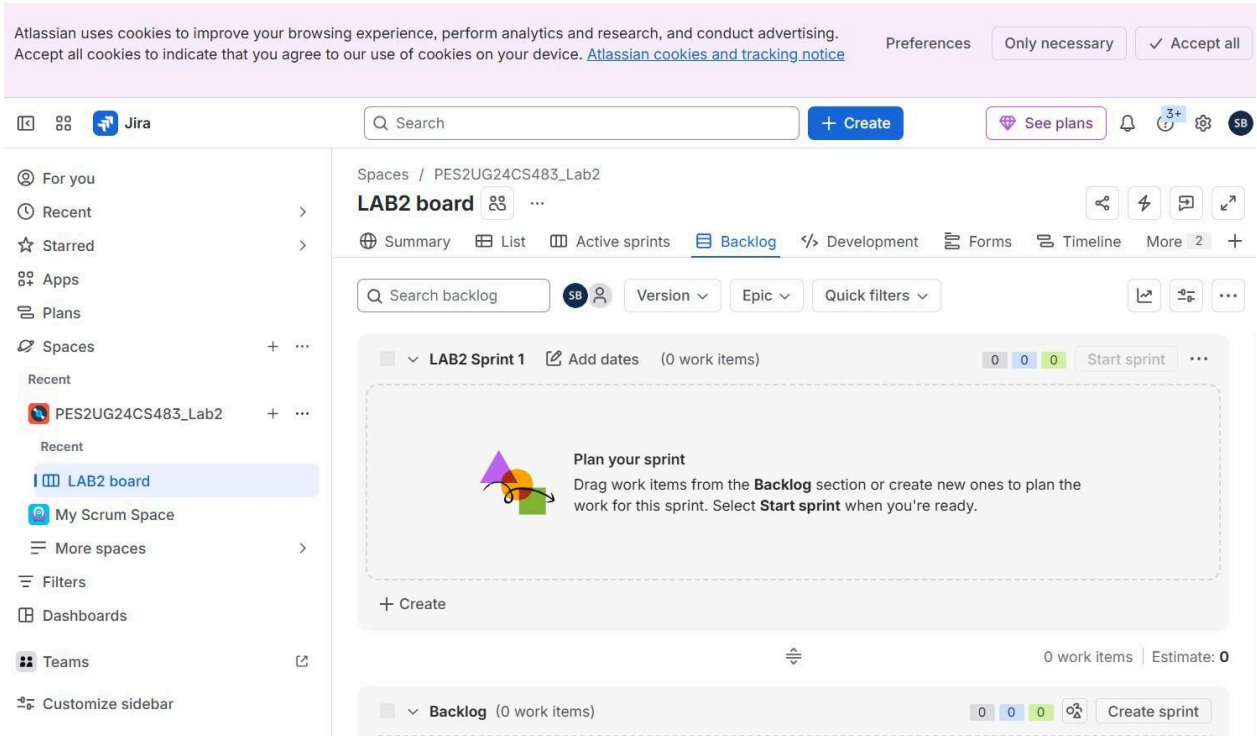

I logged into Jira using my account so that I could create and manage the Scrum project.

Jira Scrum Project Creation

I created a new Scrum project in Jira and gave the project the required name.

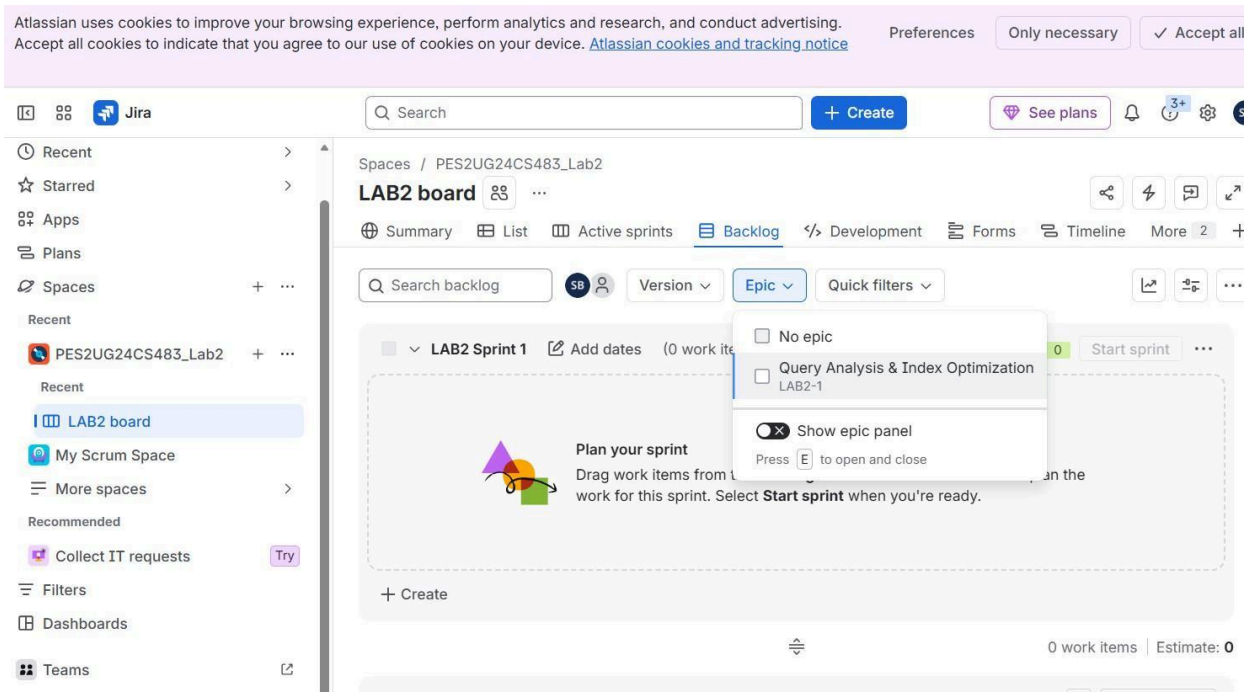

Scrum Board Got Created

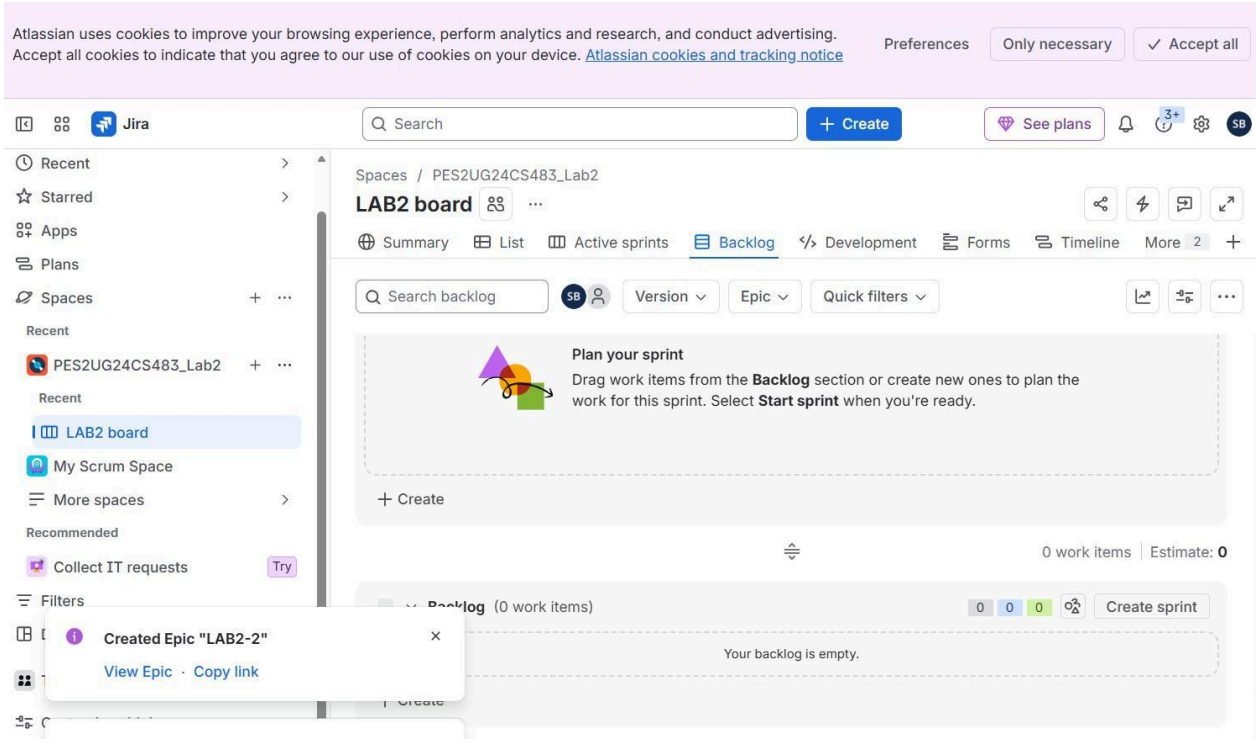

After creating the project, the Scrum board was automatically created. I used this board to manage the epics, stories and sprints.

Epic1 Created

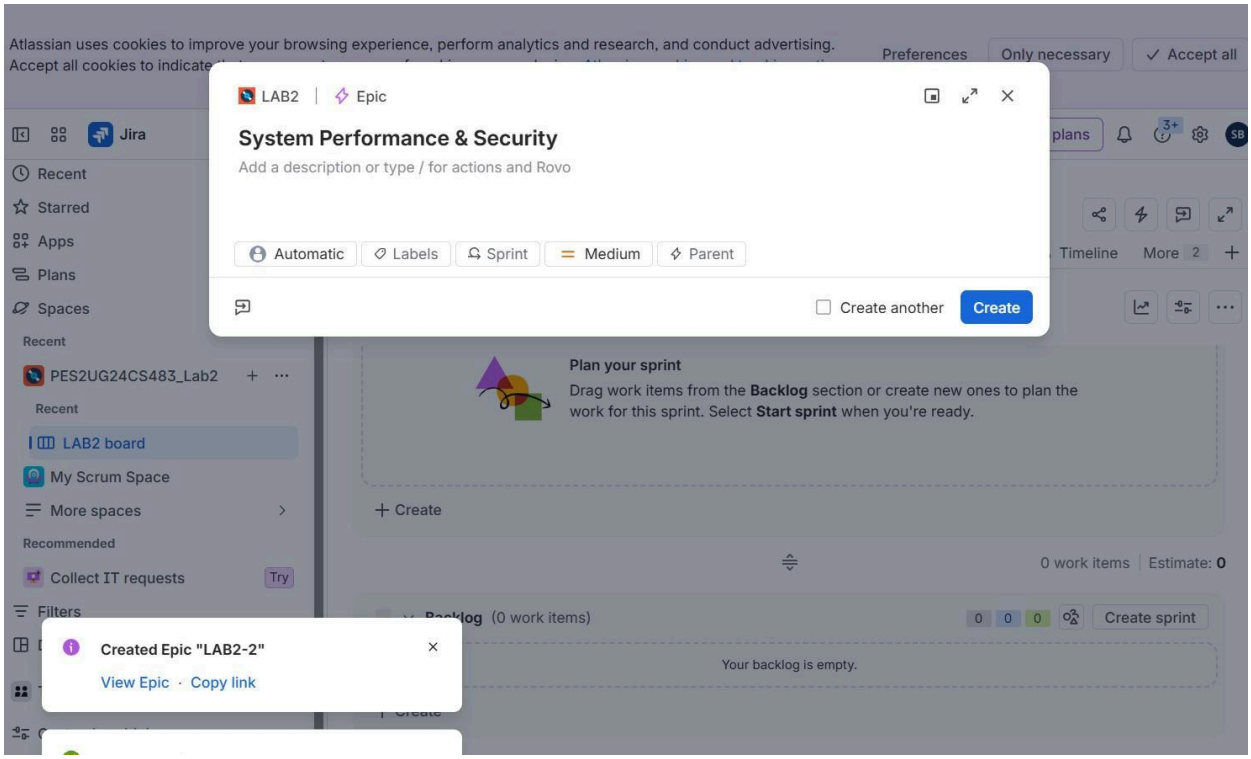

I created the first epic for the project. This epic contains the user stories related to query analysis and index optimization.

Created Epic 2

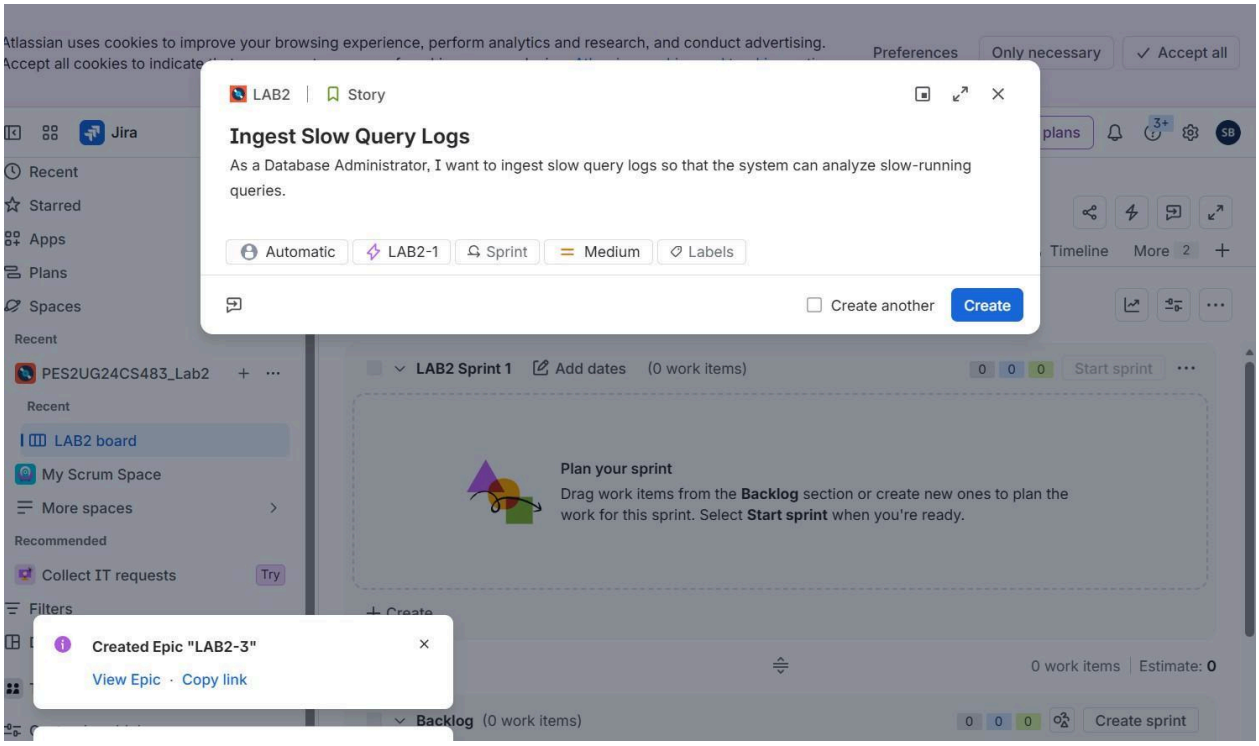

Created Epic3

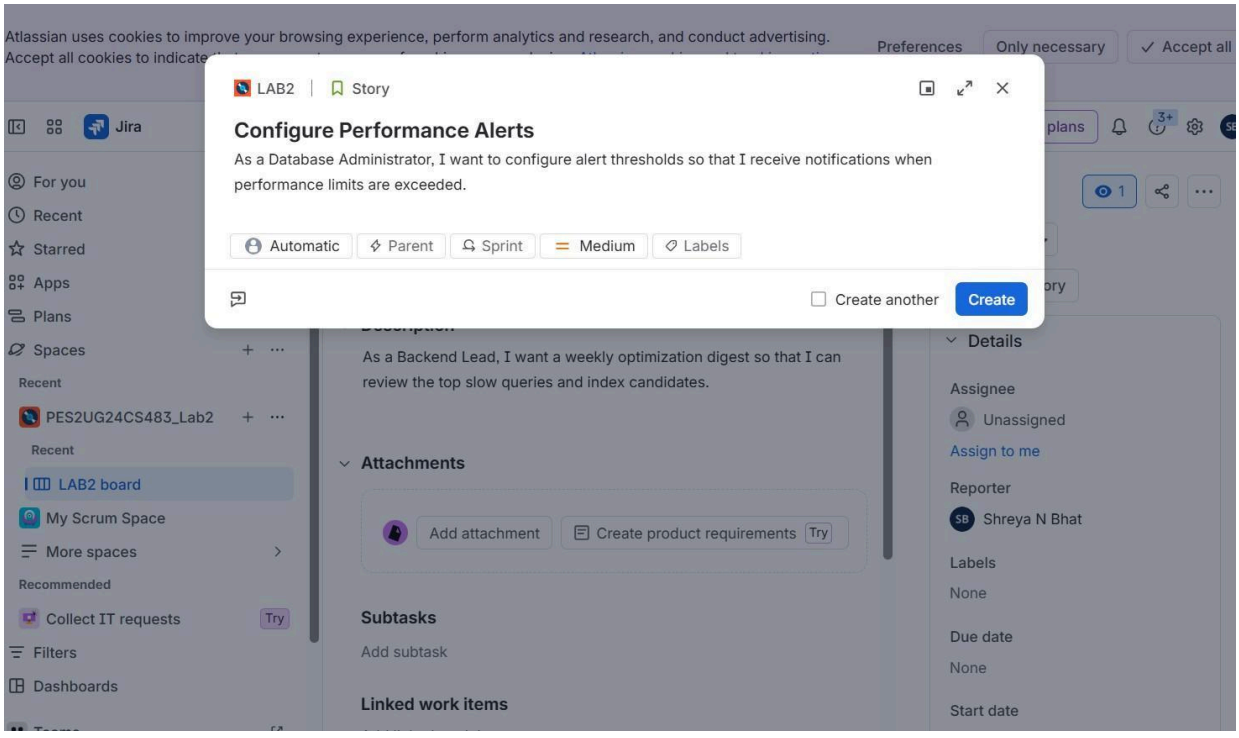

User story inside Epic 1

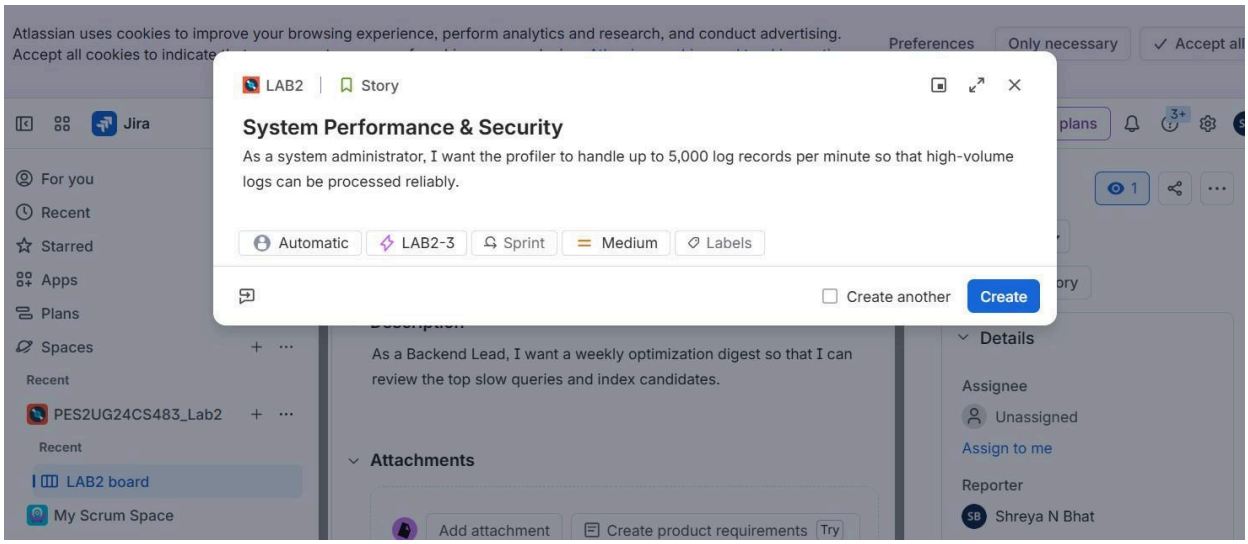

I created the required user stories and added them under Epic 1 so that the work was organized properly.

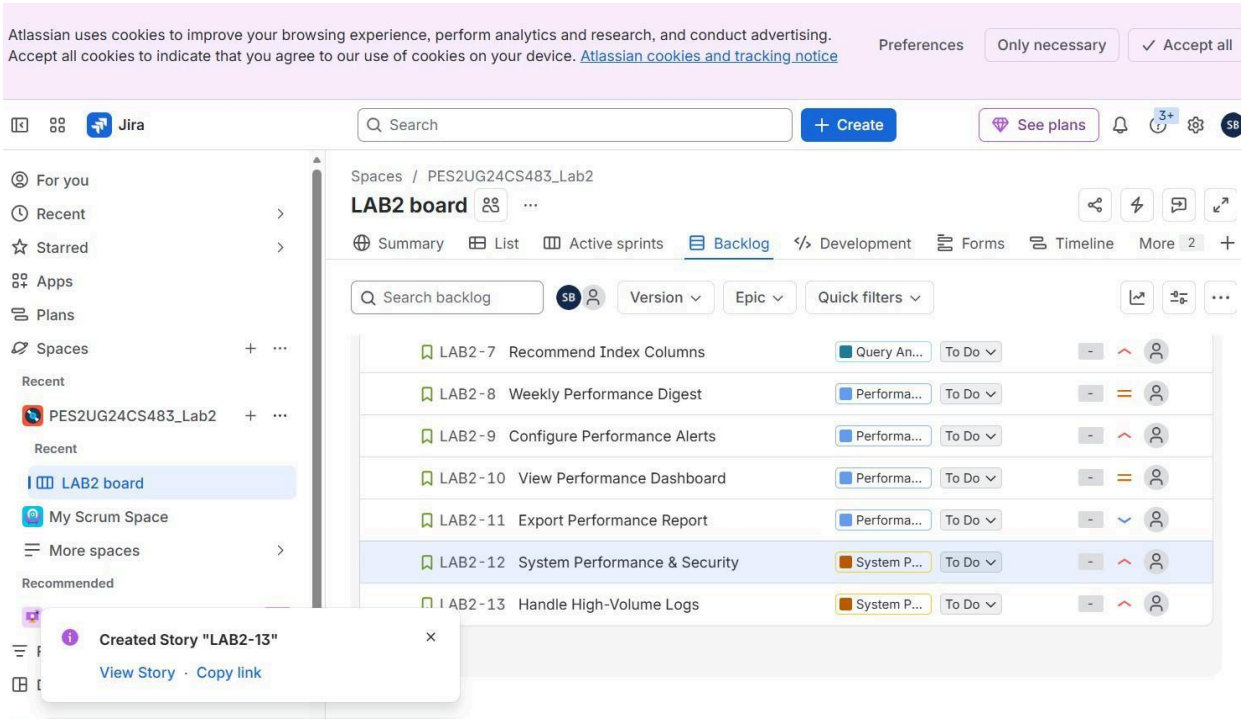

User story inside Epic2

User Story inside Epic3

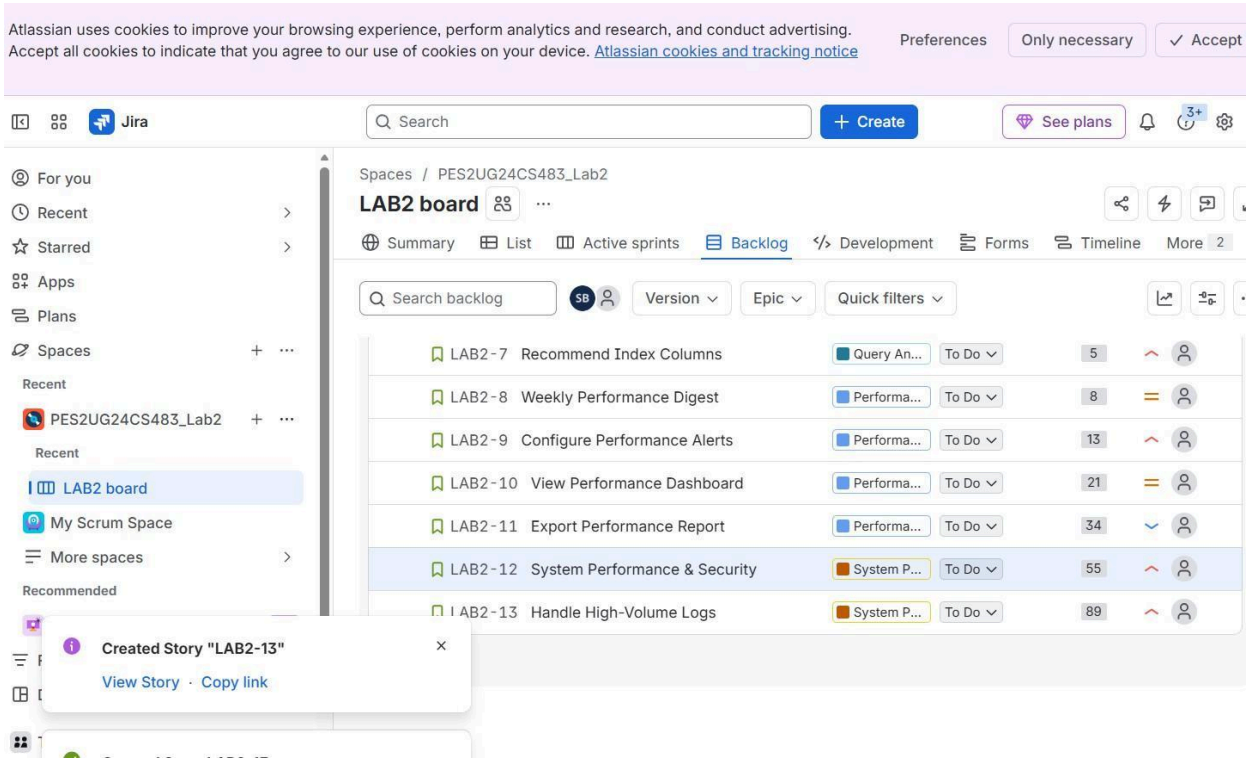

Added The Priority

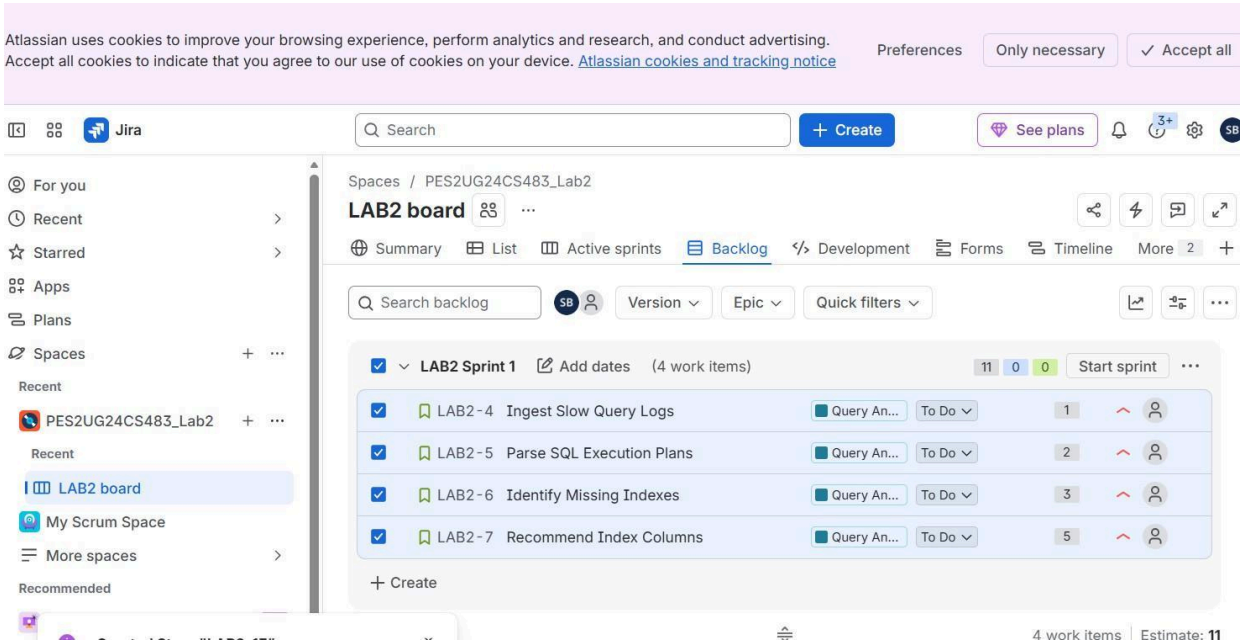

I assigned priorities to the user stories so that I could identify which work should be done first.

Assigned Story Points

I assigned story points to each user story based on how much effort I felt was required for completing the story.

Added 4 stories for sprint1

I selected 4 user stories from the backlog and added them to Sprint 1. The selected stories had a total of 11 story points.

Start Sprint

4 work items will be included in this sprint.

Required fields are marked with an asterisk *

Sprint name *

LAB2 Sprint 1

Duration *

1 week

Start date *

8/27/2026 3:20 PM

Date format: MM/DD/YYYY. Time format: e.g. 1:00 PM.

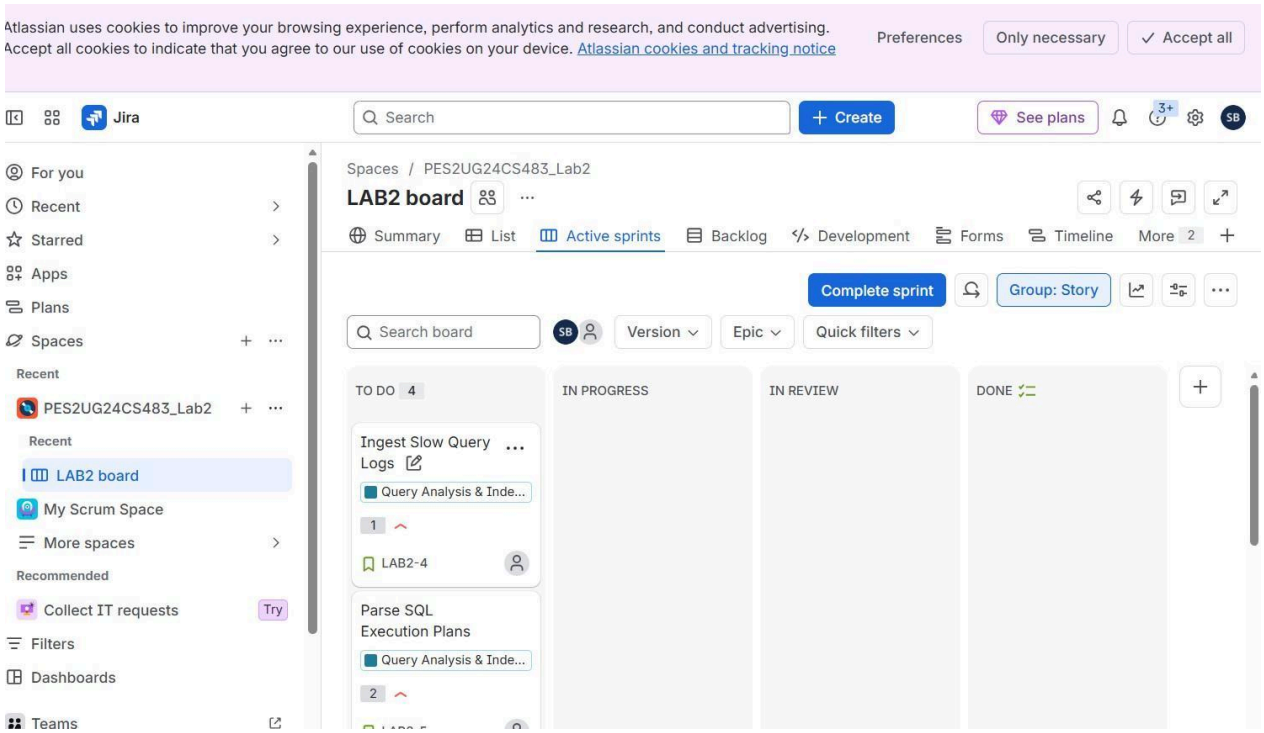

End date *

9/3/2026 3:20 PM

Sprint goal

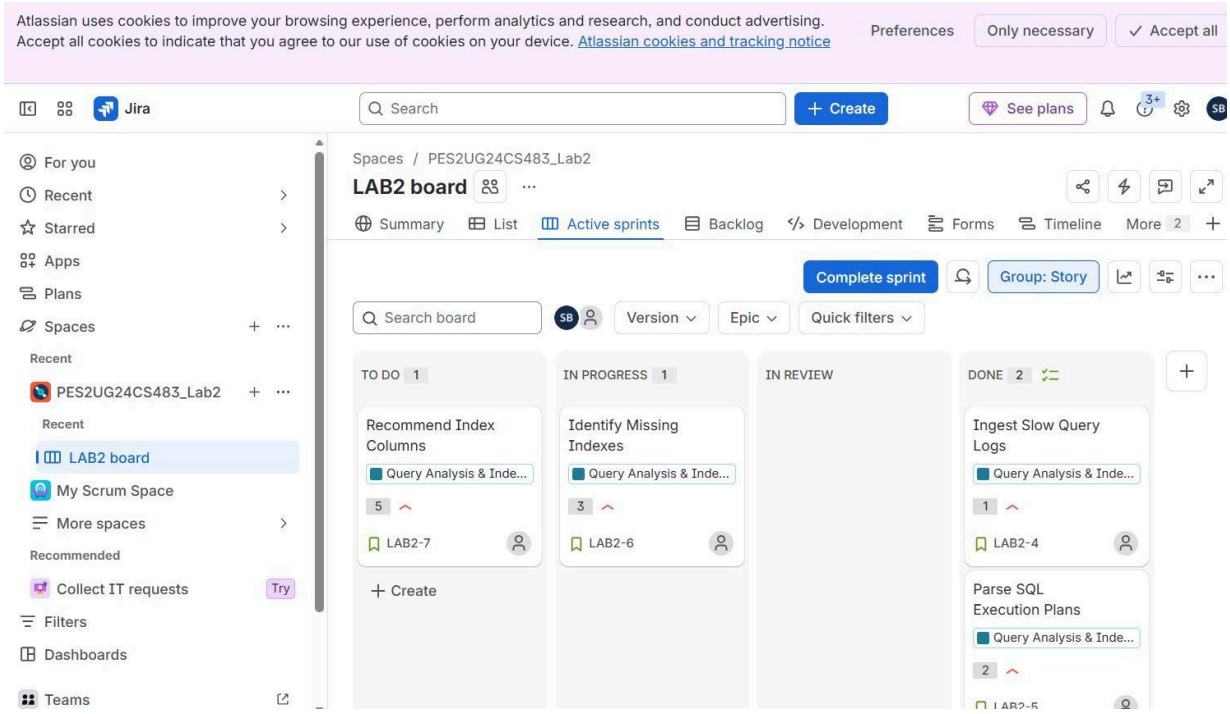

Complete database performance analysis and indexing tasks.

Cancel Start

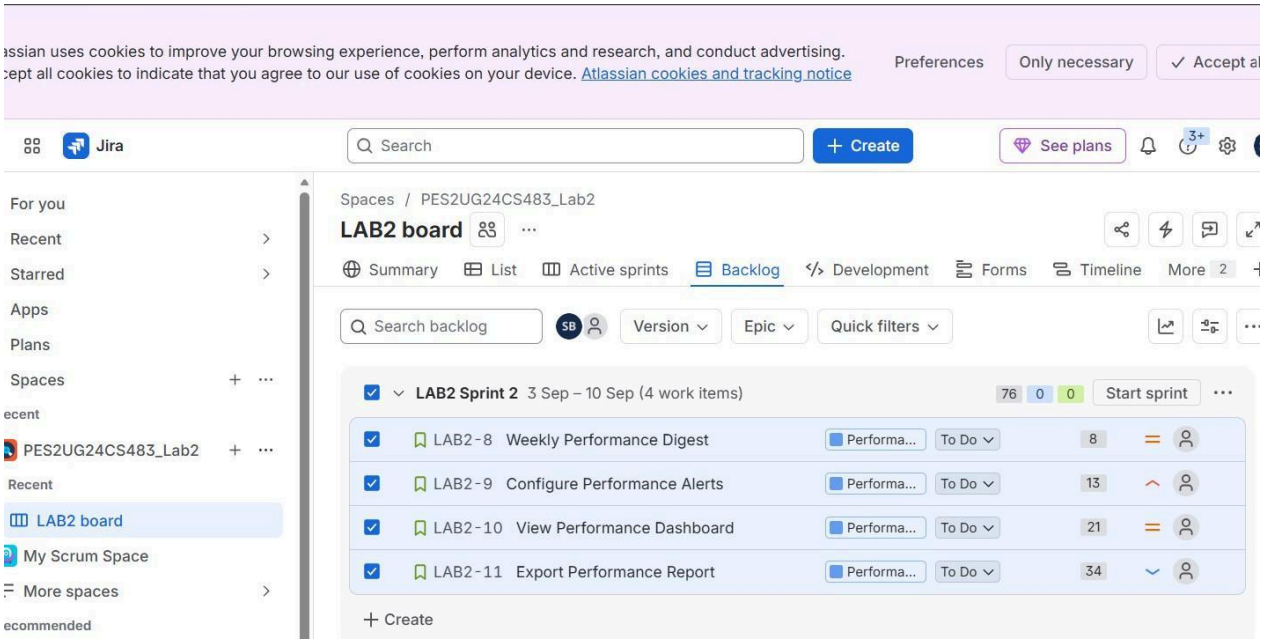

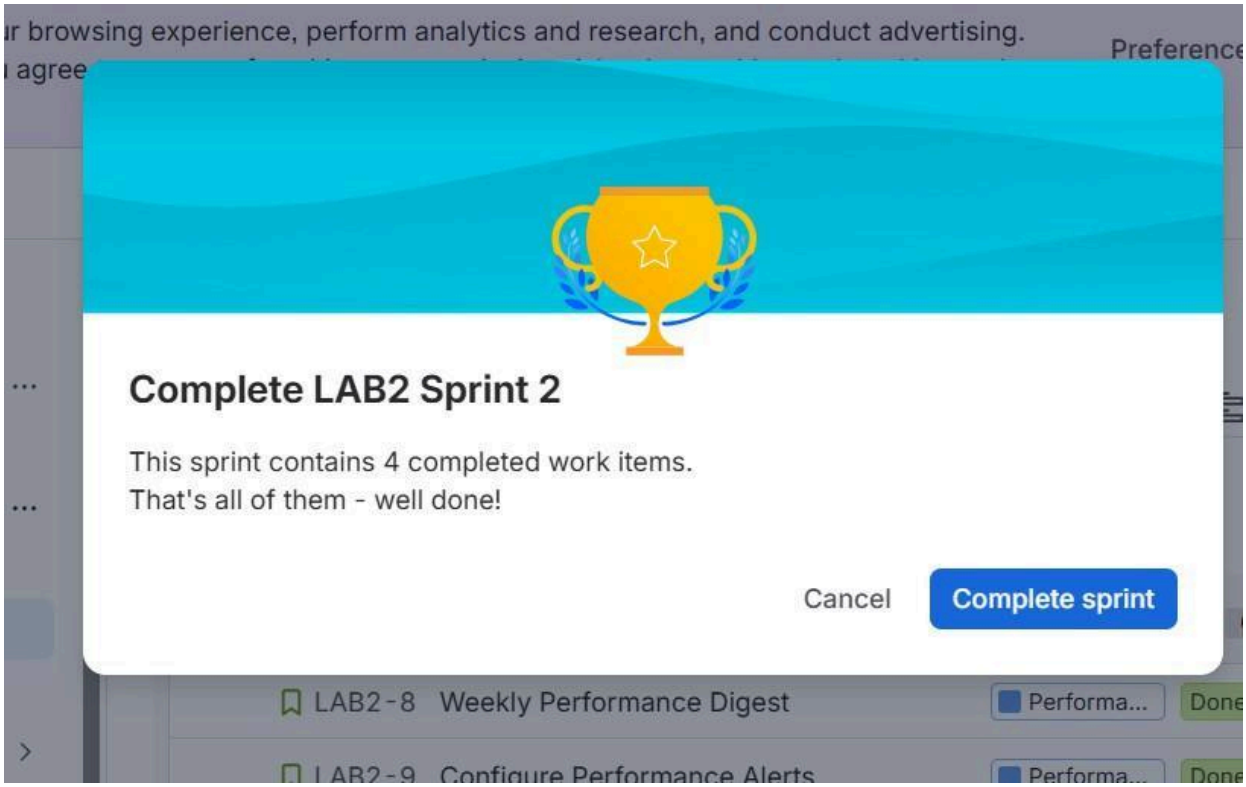

Sprint 1 Done

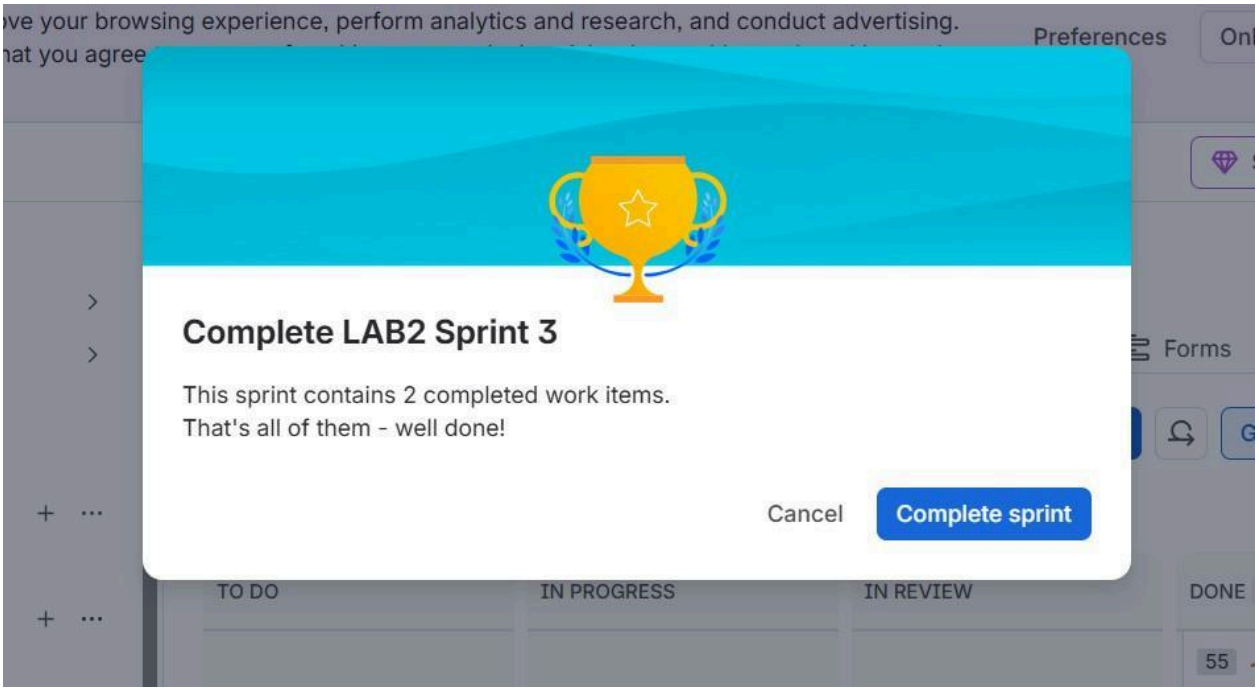

I completed all the work assigned to Sprint 1 and moved the completed stories to the Done column.

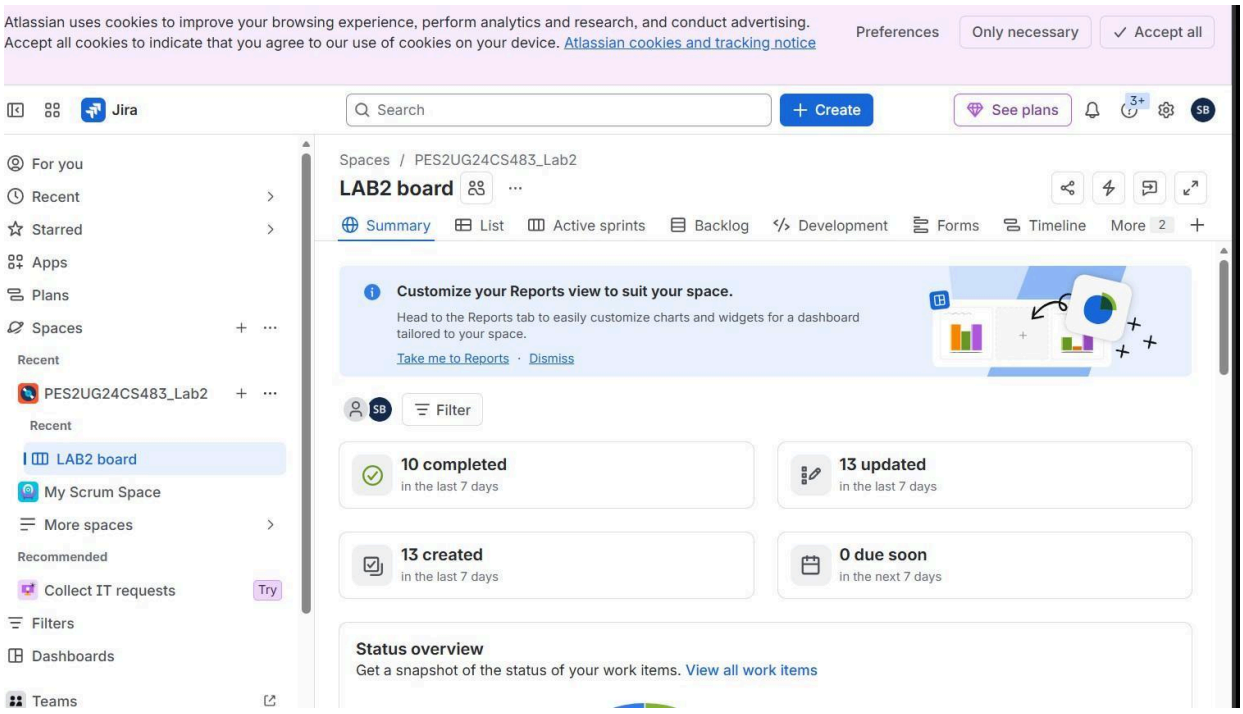

Sprint 2

BurnDown Chart

Date	Issue	Event Type	Event Detail	Story Points Inc.	Dec.	Remaining
27/Aug/26 3:29 PM	LAB2-12	Sprint start		55		
	LAB2-13			89		
	Total					144
	LAB2-12	Burndown	Issue completed		55	89
	LAB2-13	Burndown	Issue completed		89	0
	LAB2-12	Sprint ended by Shreya N Bhat				0
	LAB2-13					0
	Total					0

I checked the Burndown Chart to see how the remaining work decreas

Reflection Questions

1. Did your estimations reflect the actual effort?

Yes, my estimations were mostly correct. The stories with more story points took more effort compared to the stories with fewer points.

2. Was your backlog well-prioritized?

Yes, I prioritized the important user stories first and selected them for the sprint based on their priority.

3. How did your simulated sprint align with your plan?

My sprint went according to the plan. I selected 4 stories with a total of 11 story points and completed all of them.

4. What insights did the burndown chart give about your team's capacity?

The burndown chart showed that the work was getting completed during the sprint. Since all 11 story points were completed, it showed that the planned work was manageable for the team.
